Airflow controls
Easily pause or adjust airflow

Temperature controls
Set and adjust heat settings

Swivel cord
Effortless styling no matter the angle

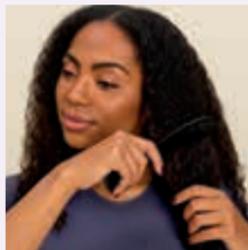

*in wet-to-dry mode | **colors may vary

Getting started with SilkiPro Straight

Step 1: Prep + Stretch + Section

Ideal For
100%
Wet Hair

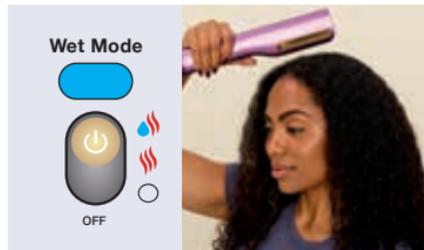

Wet

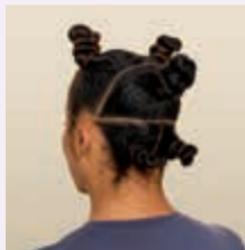

First, gently detangle wet hair and apply heat protectant.

Clamp SilkiPro Straight and push latch upwards to lock in place.

To rough dry, set to WET MODE and direct the airflow at your roots.

Lastly, section your hair.

-OR-

For additional stretching and detangling, use the Wide-Tooth Comb attachment.

Ideal when rough-drying roots and stretching thick, curly, or coily hair.

Lock your SilkiPro Straight after inserting the wide-tooth comb for a secure fit.

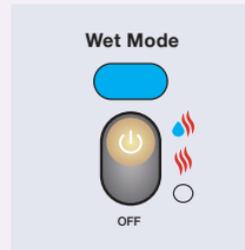

To stretch and dry, set to WET MODE and slowly slide Wide-Tooth comb through hair.

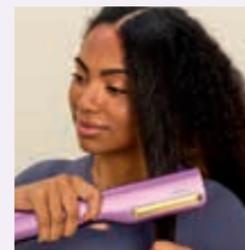

Step 2: Dry + Smooth

Ideal For
70%
Dry Hair

Wet

Before straightening, ensure that your hair is at least 70% dry. Then toggle the switch to WET MODE.

Clamp and glide SilkiPro Straight slowly down each section, keeping the airflow directed downward.

Wet-to-straight in as little as one pass.

Gentle Comb

Precision Comb

For control and silky styles in WET MODE or DRY MODE, use smoothing comb attachments.

See page 4 for more information.

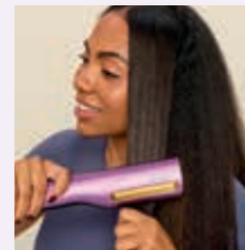

Step 3: Gloss Lock + Style

Ideal For
100%
Dry Hair

Dry

LED light will flash red when preheating and turn solid when ready.

You can also use DRY MODE between washes to refresh your style.

Ultra glossy, silky smooth finish.

Meet your smoothing comb collection

*Accessory colors may vary

Line up the arrow on the wide-tooth comb with the comb track to insert.

1. Line up and insert comb using the comb track
2. Comb is locked in place when you hear a click
3. Remove or swap combs by pulling the tabs (circled)

NOTE: Do not insert or swap combs AFTER dry mode usage to avoid damaging the unit and preventing unwanted burns.

Pre-dry

Wide-Tooth Comb

Helps rough-dry roots and detangle hair, making it ideal for prepping thick, curly, or coily hair

Wet mode + Dry mode

Gentle Comb

Gives a softer touch with less tension—perfect for a natural, straight look full of body and movement

Precision Comb

Designed for more tension and control, this comb helps guide each strand smoothly through the plates for a sleeker, straighter finish

Find Your Perfect SilkiPro Straight Settings

Customized recommendations for your hair type

Recommended heat settings

Type	Hair section	Wet setting	Dry setting
/ STRAIGHT	1.5 inch	Medium Heat High Flow	Medium Heat Low Flow
~ WAVY	1.5 inch	Medium Heat High Flow	Medium Heat Low Flow
🌀 CURLY	1 inch	High Heat High Flow	High Heat Low Flow
🌀 COILY	1 inch	High Heat High Flow	High Heat Low Flow

Plate temperatures

Temp	🛡️ Wet mode	Dry mode
HIGH	120°C / 248°F	220°C / 428°F
MEDIUM	110°C / 230°F	190°C / 374°F
LOW	100°C / 212°F	160°C / 320°F

Intuitive Sensors

Intuitive sensor automatically lowers airflow when you're not styling for a quieter experience.

Auto-Shut Off

After 3 minutes of inactivity, unit powers down to save energy and protect your styling surface.

SilkiPro Straight's low-temperature plates (248°F in WET MODE) and precision airflow dry and style hair from wet to dry in one step with **no thermal hair damage**.

Stylist-approved tips for **best results**

Proper Sectioning Matters

Start with detangled hair and work in **1-2 inch sections** for maximum control, and stress-free straightening.

Slow Glide = Fast Results

Move the straightener **slowly and steadily** through each section. One controlled pass delivers better results than rushing and redoing.

Focus On The Finish

DRY MODE is your final step, not a do-over. Use it to smooth flyaways, refine the shape, and polish the ends.

Experiment With The Combs

Each comb is designed for different hair needs. Try all three to find what works best for your hair type—you may be surprised by the results.

Shark

SilkiPro Straight

We made this so you can feel **confident, beautiful, and unapologetically YOU.**

From day one, our goal was simple: create a tool that works for every hair type. We spent countless hours testing, learning, and perfecting every detail—not just to meet our standards, but to exceed yours.

What you've just unboxed is the result of passion and precision from a team that's obsessed with hair. From our product developers and engineers to designers and stylists, every decision started with one question: How will this make you feel your best?

We hope that every time you style with **Shark SilkiPro Straight**, you feel the dedication and care that went into bringing it to life.

Here's to great hair days,

The Shark Beauty Team
